

Product and Technical News in Apr. 2018

VENUS X3

Version: V2.04

- **Update**

1. Under 4K1K mode, 4K30Hz input module supports unequal type splicing. The software version of 4K30Hz input module should be V2.15 or higher.

And please pay attention to the follows:

1) The software version of XPOSE should be V1.2.2.17 or higher.

2) If the split type is unequal type in horizontal, the parameter setting for width is required as $1840 \leq \text{width in total} \leq 2000$.

- **Optimization**

1. It may cause a split gap when the 4K60Hz signal is scaled. (software version for 4K60Hz input module is V1.12)

2. It may cause a split gap when the HDMI signal that input via D-HDMI input module is scaled. (software version for D-HDMI input module is V1.38)

3. The T-Bar switching effects via TONE.
